

THERMOS 110[®]

Thermally Broken Sliding Series

GLAZE TECH
System Solution Providers

INTRODUCTION

Glazing Technology International System (GLAZETECH) are one of the leading aluminium architectural solution providers through innovative system and special component designing.

After the successful launch of Elegant 65® Glazing System, GLAZETECH is now proud to introduce a high performance, high Tech Thermally Broken Sliding System Thermos 110®.

Thermos 110® has superior features and characteristics that will answer to the region's harsh climatic, wind load and pressure challenges.

In this 110 mm. Series, apart from the traditional double sliding tracks for doors and windows, there are options for arches and architraves. There is also an economic option, in which the active panel is slider only in a single track frame and the second panel is of fixlite. The economic option derives savings in accessories and also in aluminium profiles, besides ensuring a better performance on air penetration, water infiltration and energy savings.

The system's high performance is guaranteed as the profiles are extruded at Elite Extrusions, LLC – Ras Al Khaimah, which is equipped with latest all European manufacturing facilities, and is controlled by highly qualified and experienced personnel. On the other hand, the thermal insulation is ensured by using fiber glass reinforced polyamide webs, which are directly imported from the world's leading manufacturers.

The system is designed to be compatible with standard Eurogroove accessories and is carefully tailored to limit the use to optimum numbers of accessories per unit.

Right from the design stage, the ease of fabrication requirements are ensured so that the system can be fabricated within shortest possible lead time. The technical design of the product meets all the statutory and regulatory requirements followed in aluminium and glass fabrications.

Last but not the least, GLAZETECH would be ever happy to render technical assistance to all its clients and customers upon requests.

At GLAZETECH, we firmly believe in building relationship and partnership by constant dialogues and interactions with Architects, Consultants, Contractors, Fabricators and the End Users. We now invite you to derive benefits of Thermos 110® for your profitable, durable and prestigious projects
