

GLOBAL PIONEER
ALUMINIUM INDUSTRIES LLC

ELITE
GROUP OF COMPANIES

A member of Elite Group of Companies

Aluminum fabrication and metal works

Industry Experts in Architectural Aluminium Works

Global Pioneer Aluminium Industries LLC it's a specialized company in designing, engineering, fabrication, supply and installation of aluminium works and advanced curtain walling systems.

Established since 1976 as pioneer in the aluminium industries in the region, since 2004 is member of Elite Group of Companies for which can be considered the in-house fabrication division of the group. Therefore we are into a supply chain relationship from production to fabrication, being related to the extrusion for aluminium and EPDM rubber profiles and so be a unique player who can connect the raw material to the final product under the same name.

Based in Ajman, U.A.E., in a 26.000 square feet area we guarantee clients' assistance and undertaking of turnkey projects, complying with the specifications, designs and the best of quality aluminium fabrication and related metal works. These are the fundamental of Global Pioneer Industries.

Machineries & impeccable workmanship

Our commitment to technical excellence has led us to invest in machineries, shaping utensils, designing unit and whole infrastructure, enabling us to offer comprehensive engineering designs, quality craftsmanship to configure customers' orders in advance.

Sphere of Operations:

Irrespective of the scale of the project the engineers and designers at Global Pioneer work on par with the clientele, help evaluate their project requirements and bespoke the aluminium solution and related metal needs. Area of specification are:

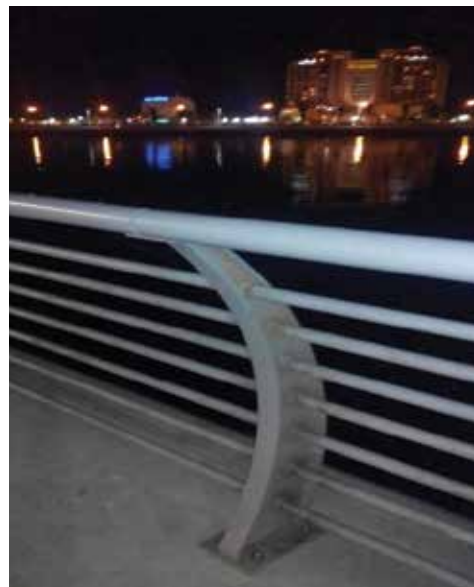

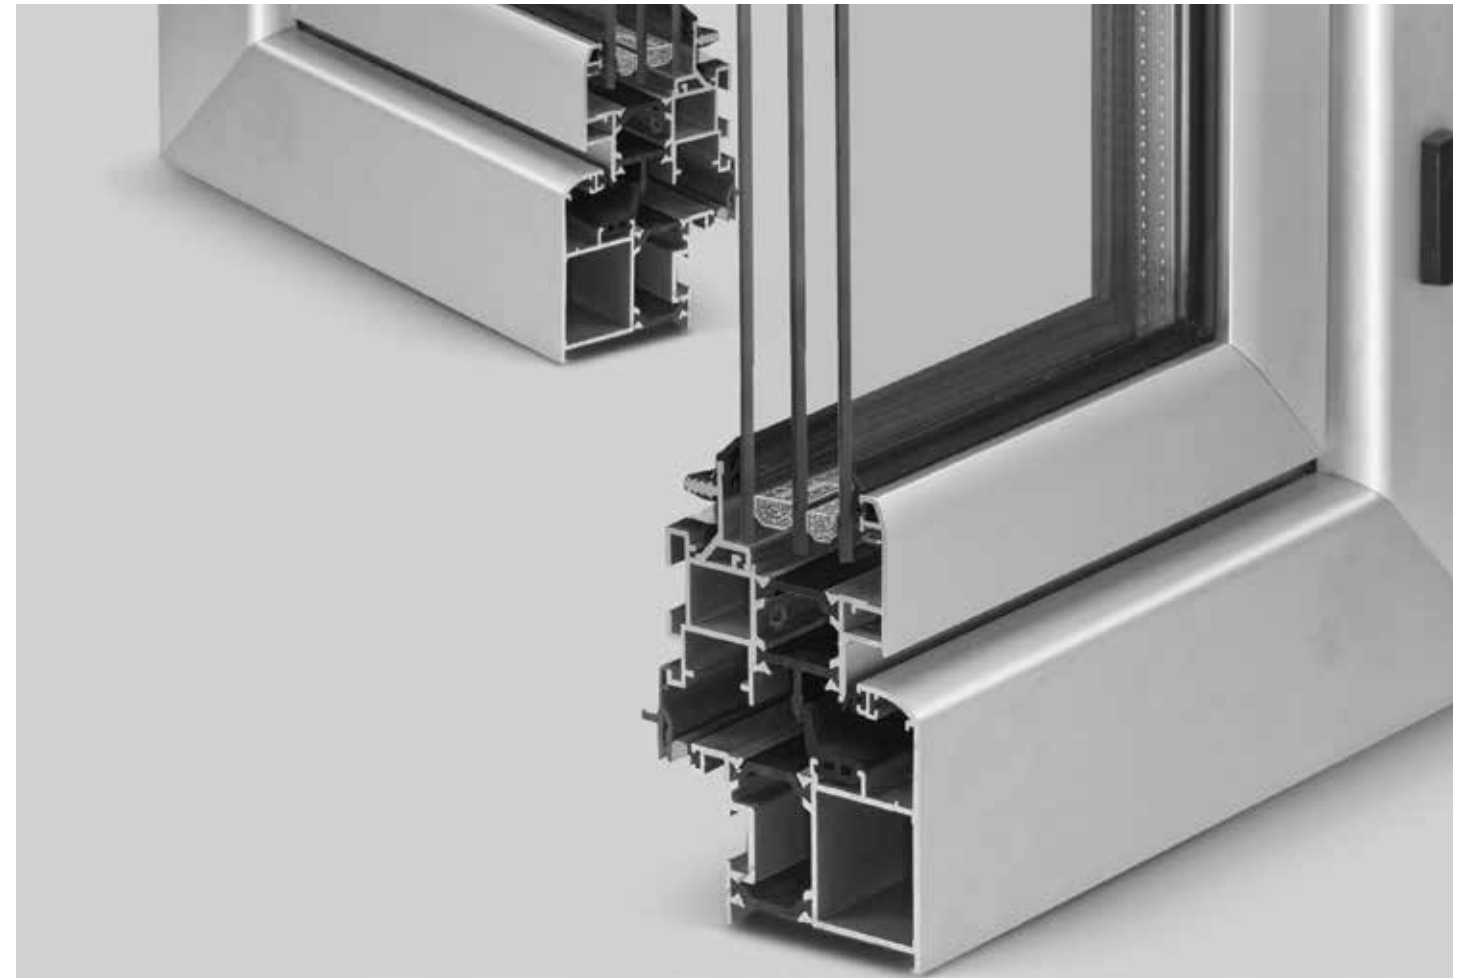

- Turnkey projects of complete aluminium and related metal works, with projects management until handing over to clients or end users.
- Clients and Designers' consultancy, project wise to architectural address according to specifications and client requirements.
- Contracting & subcontracting for design, engineering, procurement, fabrication, supply, and installation of all kinds of architectural and non-architectural aluminium works.

Comprehensive Product Range

We design, extrude and supply an extensive array of durable, custom-made fabricator profiles for commercial, industrial and residential applications in the region and across the GCC region.

Fabrication capabilities range from large bespoke aluminium structures to small aluminium components or standard section assembly, including:

- Curtain Wall systems
- 2 sides structural glazing
- 4 sides structural glazing
- Unitised Curtain Wall Systems
- Thermal & non-thermal break systems
- Frameless facades/spider systems
- Metal claddings and composite panels
- Roof domes and sky lights
- Aluminium Pergolas
- Aluminium doors/windows/shop fronts
- Aluminium and stainless steel handrails and balustrades
- Security and decorative claustras
- Rolling shutters with built in mechanical and electrical shutter device

Global Pioneer is also licensed for fabrication and installation of the modern glazing systems engineered in Elite Group:

- THERMOS 110® and THERMOS 120® sliding series, thermal break.
- ECO 500® casement and sliding series, thermal break.
- Elegant 65® & Elegant 50® Structural Glazing System, thermal break.
- AL-WIN 80® casement series and AL-WIN 105® sliding series, non-thermal break.

In architecture and building construction a thermal break is an element of low thermal conductivity placed in an assembly to reduce or prevent the flow of thermal energy between conductive materials. Subsequently aluminum windows and doors separating the frame into two separate interior and exterior pieces joined with a less conductive material reduces temperature transfer.

Thermal breaks are made of hardy, rigid, low thermal conductive polyamide or polyurethane which is mechanically locked in aluminum window framing. Moreover thermal breaks can have the added benefit of reducing sound transmittance by dampening vibration.

Excellence in operation & service

Global Pioneer is involved in a workflow with the extrusion sister companies to operate in straight-chain afterwards the aluminium and rubber profiles manufacturing, and so offer the benefit of their knowledge and experience in the aluminium & glass along with the accessories industry.

Hence the company is entitled to manage project in different emirates and so offer our specialization under a single license.

We offer unparalleled service from the initial concept to the project completion in our sequential methodology:

- Shop drawings
- Materials take off
- Material submittal
- Works program
- Procurement
- Fabrication
- Quality control
- Supply
- Installation
- Testing
- Handover

Projects

Global Pioneer has successfully completed many prestigious projects across the region. Our spectrum of aluminium applications and services are often referred to various clients by some of the renowned Architects, Interior Designers and Contractors in UAE and across the Middle East.
